Dear NEB Customer,

Attached, please find advance notice of NEB's product pricing effective January 1, 2011.

New England Biolabs remains committed to supporting scientific research and offering its customers the highest quality products at exceptional value. With this in mind, NEB continues to look at ways to minimize its costs and is pleased to announce that it will be keeping the prices for over three quarters of its products the same as they were in 2010.

For some products, we have, unfortunately, had to increase prices, mostly as a result of increases in production costs. However, even including these increases, the overall effect of these 2011 price changes is an average increase of only 0.78%.

Price and/or number of units supplied, is changing for 394 of our 1,563 products. Changes include:

* 384 price changes averaging a 2.97% \$ increase on those products (includes a 31% \$ **decrease** on product # S1315S Universal miRNA Cloning Linker)

* 10 products with increased units, 6 of these with slight price increases also, resulting in an average \$/unit **decrease** of 38% on those 10 products.

Calculation of price change only (not including the beneficial unit increases) over all 1563 products = 0.78% price increase.

There are three tabs in this workbook:

The first tab contains a complete list of NEB's 1563 currently available products with prices which will be in effect starting January 1, 2011. Columns are:

- A) Product Number
- B) Jan2011 Item Description – Long
- C) Item Description – Short
- D) Unit Size (the actual number of units in a vial) effective January 1, 2011
- E) Unit of measure (always EA representing each)
- F) NEB List Price effective January 1, 2011
- G) Customer pricing at appropriate discount level
- H) Effective Date of change and/or product release
- I) Manufacturer
- J) Mfg. Part number
- K) UNSPSC Code

The second tab lists the 394 products being changed, and notes what is changing on each.

The third tab explains the contents of the file.
