- TeleCheck warranty
- WEX/Voyager[1]
- Telecheck Electronic Check Acceptance (ECA)[3]

How can we help?

Next-generation terminal provides EMV Chip card support, IP and WiFi capabilities with dial back-up

The First Data® FD130 is an affordable terminal solution that combines performance, reliability and ease of use in a compact, feature-rich device. In addition, with new security guidelines coming soon, the FD130 prepares you to eventually accept transactions when customers present an EMV chip card; that is, a card embedded with a special microprocessor chip that adds an important layer of security.

Business types supported

Retail, Restaurant, Quick Service, Petroleum[1], and Direct Marketing (MOTO)

Product benefits

- **Easy installation** — Get up and running quickly with the intuitive touch-screen display for ease of use.

- **Account number truncation compliant** — Help protect your customers' card information from identity theft by truncating the account number and masking the expiration date on customer and merchant receipts.

- **Fast connection** — Supports WiFi, Internet Protocol (IP) with Secure Socket Layer (SSL) encryption, plus dial back up over an analog phone line.

- **Allows simple paper roll replacement** — 2.25"-wide thermal roll can be dropped in place without feeding through slots and rollers.

- **Large batch capacity** — Stores up to 450 transactions.

- **Contactless support** — Process contactless payments from NFC enabled cards, fobs, and mobile wallets.

- **EMV** — Prepare for EMV chip technology and new security guidelines that add an important layer of security.

- Keep infrastructure costs low with a combination terminal, PIN pad, EMV Chip reader, contactless reader and printer.

Together we'll go far

Industry-specific features

- **Security features for card-not-present merchants** — Be alerted to possible fraudulent activity with Address Verification Service (AVS); Card Verification Value 2 (CVV2); Card Validation Code 2 (CVC2), and Card Identification Number (CID) fraud services.
- **Meet the needs of quick service customers** — Quick service merchants can offer signature suppression for transactions under qualified floor limits.
- **Purchase card level I and II, business and commercial cards** — Allows tax prompting on all Visa and MasterCard commercial cards.

First Data FD130 terminal features

- Touch-screen capability with 320x240 color display
- 16-button keypad
- True 32-bit processing (ARM9 32-bit CPU core)
- Bidirectional magnetic stripe reader, tracks 1, 2, 3
- EMV Chip card dip reader allows acceptance of EMV secure chip cards
- Swivel stand is an available option for an additional cost. Allows merchant to turn the terminal to the customer for card processing.

Operation highlights

- Intuitive touch-screen display for ease of use
- Fast terminal downloads using IP or dial-up, with WiFi as an option
- Terminal-initiated batch settlement
- Demo mode for training purposes
- Bar tab
- Comprehensive reporting: totals, batch detail, clerk/server, tip reporting, batch history

Security features

- PCI PED approved[4]
- Password protection
- Retail Address Verification Service (AVS)
- Account number truncation/expiration date masking on customer and merchant receipt copies
- Card verification support for card-not-present — Visa (CVV2), MasterCard (CVC2), Discover (CID)
- Capability to accept EMV chip transactions that enhance security

Dimensions

- Height: 3.5"
- Width: 3.7"
- Length: 7.87"

Connection type and speed

- Wired and Wireless (WiFi) Internet Protocol (IP) connectivity with dial back-up[2]; IP transactions approve in about 4 seconds

Batch capacity

- 450 transactions
