

Hypercom® Optimum T4220

Wells Fargo Merchant Services

WELLS
FARGO

Speed, Convenience and the Latest Technology

The Optimum T4220 supports multiple applications, and provides quick communication over your broadband connection with automatic dial back-up. With Wells Fargo, you have a proven payments processing solution for years to come.

Benefits Streamline And Grow

- Process transactions quickly — Broadband connection moves customers through fast, and automatic switch-over to dial connection provides reliable back-up.
- Provide the most reliable security available — Uses HyperSafe32 architecture to provide the ultimate in security.
- Offer multiple payment options — Supports credit, debit, EBT, Discover® Network, American Express, gift card and TeleCheck services*.
- Print receipts quickly — Clamshell thermal printer virtually eliminates paper jams and prints 15 lines of text per second.
- Save countertop space and add convenience — Comes standard with integrated PCI PED approved PIN entry capability. Supports external PCI PED devices, as well.
- Read easily with bright, clear display – Backlit LED screen maximizes visibility.

Features Maximize Your Payment Solutions

The Hypercom T4220 provides power and performance:

- Lightning-fast 32-bit ARM 9 processor with V.34 modem standard
- Abundant memory (24MB) supports multiple applications simultaneously

The unique design of the Hypercom T4220 includes:

- Smart, integrated PCI PED PIN entry capability
- New large, ADA style, 19-key layout provides easy key recognition for the visually impaired
- Slim form that allows you to easily hand the PIN entry device to a customer who then enters their own PIN
- Splash-resistant surface
- Built-in thermal printer

Plus Enjoy These Additional Benefits As Our Customer

- Improve cash flow — Receive funds from most transactions the next business day when you fund to a Wells Fargo deposit account.
- Get 24/7 access to your data — View account information and use a wide range of management tools online with our included Internet-based service.

*TeleCheck services will be available with this terminal in mid-2009.
